ECO-DRY DEHUMIDIFICATION SYSTEMS

Phone 914-245-3100
visitecogreen.com

Our Eco-Dry dehumidifiers are the best when it comes to dealing with high humidity levels in the basement and Crawls. Moisture is the most common problem in basement, and in Crawls is air entering from outside. The soil around the walls can contain a large amount of moisture from surface water that is seeping down or from a high water table.

- ◆ Energy Star Rated
- ◆ Built-in defrost system
- ◆ Built-in DE humidistat
- ◆ Optional Duct Kit available
- ◆ Self pump or direct feed to drain

Crawls

Basements

Eco-Dry dehumidifiers are Energy Star rated. When you see the Energy Star logo, you know that you are purchasing a dehumidifier with superior energy efficiency that will help you save money. Energy Star rated dehumidifiers are built with more efficient refrigeration coils, compressors, and fans compared to conventional models, so they remove the same amount of water but use less energy.

We offer several different models to accommodate any size room or area affected with high moisture content. These dehumidifiers can be installed quickly in the basement and Crawl, and we have a variety of models available. The dehumidifier will control the levels of humidity in the air, to help prevent dangerous mold growth, or other structural problems.
